

Solution Overview

Alert Beacon®

Flashes and sounds to capture building occupant's attention and displays emergency messages; typically wall-mounted in common areas

LED Marquee Display

Placed overhead, used in conjunction with Alert Beacon® for large public spaces

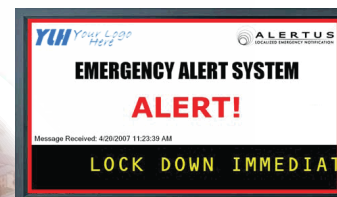

Panic Button

Placed side-by-side with Alert Beacon®, for individuals to call for help; liftable cover prevents false activations

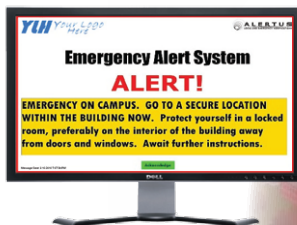

Digital Signage Override

Easily override content on any LCD/plasma digital signage systems

Alertus Desktop™

Pop-up full screen alerts on all or select network connected computers

Cable TV Override

Easily override content of all television stations

Text-to-Speech Interface for Indoor Public Address Speakers

Drives custom alerts to your voice notification speakers and eliminates unnecessary steps and fail-points

Text-to-Speech Interface for Outdoor Giant Voice

Unified notification with crystal clear intelligibility

Fire Alarm Interface

Integrates your fire and mass notification systems to ensure consistent alerting, as mandated by NFPA72-2010

VOIP Phones

Deliver messages across your VOIP infrastructure

Third Party Interoperability

Threatwatcher
ex. NOAA Warnings
