

Cisco VoIP Phone Notification

Alertus Technologies' VoIP phone notification transforms office phones into an instantaneous emergency communication system.

Cisco VoIP Phone Notification

Simultaneously activate audible-visual notifications to all or select Cisco phones

Visit www.alertus.com for more info

This innovative solution allows you to simultaneously activate audible-visual notifications on all or select VoIP phones and speakers. It also works alongside Alertus Desktop™ Notification and other Alertus net-centric alerting endpoints to ensure consistent enterprise-wide notifications.

The Alertus Cisco VoIP Phone Notification solution allows organizations to easily and affordably increase their notification reach using existing IP infrastructure, and allows them to seamlessly integrate VoIP Notification with their overall mass notification strategy.

Features

- **High Intensity Audible-Visual Alerting:** Send emergency notifications with text and/or audio to every phone in a defined recipient target group. The alert activates phone's speaker and plays (optional) alert tones followed by alert messages over phone's speaker until canceled. The alert text also displays on the phone screen. Audible messages play over ongoing calls in whisper mode without disturbing calls in progress
- **Notification Coverage:** Designed for large area high-occupancy facilities with multiple locations
- **Immediate Activation:** Activate and cancel alerts directly from the Alertus Console using secured connections into Cisco phone systems, resulting in fast and efficient message delivery
- **Targeting:** Manage and group IP phones by line number, device pool name, or descriptor tags in Cisco Call Manager. The system supports the use of line number exclusions and ranges to easily configure target groups
- **Call Monitor:** Alerts appropriate personnel or designated external emergency responders (e.g., to 911 for police or medical emergencies) if a call is made to monitored numbers
- **Phone Trigger:** Configure multiple extensions to trigger pre-set alerts
- **Secure:** Leverage existing Cisco phone system permissions and security

Specifications

Alertus VoIP phone notification uses software to seamlessly integrate with supported Cisco phones.

Cisco Phone Compatibility

(Check with an Alertus Sales Consultant for the latest supported models)

- 6921, 6941, 6945, 6961
- 7811, 7821, 7841, 7861
- 7905, 7906, 7911, 7912, 7920, 7921, 7925, 7931, 7937
- 7940, 7941, 7942, 7945
- 7960, 7961, 7962, 7965
- 7970, 7971, 7975
- 8811, 8831, 8845, 8851, 8861, 8865
- 8941, 8945, 8961
- 9951, 9971
- IP Communicator
- Supports CUCM Versions 9.x to Present

Alertus may recommend server updates when adding this feature to existing deployments.
