

Alertus Desktop™ For Workforce Communications

Instantly override computer displays across your network with organizational messages

Alertus Desktop™ Notification for Workforce Communications cuts through the clutter to grab busy employees' attention with high-impact, customizable alerts. Don't let essential announcements get lost in email inboxes or ignored. Pre-built templates allow HR and IT users to quickly and easily reach their target audience. Know with confidence that users received your message using acknowledgment buttons and reporting tools.

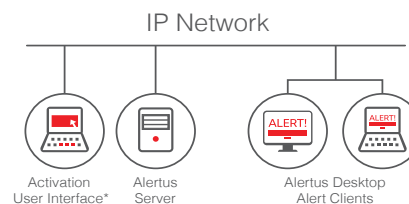

Ideal for: IT Outages | Open Enrollment Notices | Facility Announcements | Training Reminders | Office Closures

Features

- **Scheduling:** Schedule one-time communications or recurring messages
- **Prebuilt Templates:** A library of customizable internal communication templates featuring modern designs
- **Targeted:** Reach desired recipients with targeted audience lists
- **Reporting:** Recipient acknowledgment options give you insightful reporting on message delivery
- **Flexible Display Modes:** Fullscreen notification, quarter/partial screen, and scrolling ticker notifications for a range of communication levels
- **Lock Screen Alerts & Login Screen Override:** Display alerts on computers when user's screen is locked or when no user is signed into the device
- **Accessibility:** Automatically enunciate the alert message with text-to-speech to ensure your messages reach everyone
- **Audio Messages & Tones:** Upload audio messages and tones up to 100 MB. Or, select one of the many tones available standard from the Sound Library
- **Images & Links:** Images can be easily embedded in the pop-up alert. Or, chose from the provided library of useful emergency and informational icons and images
