

Integration

Trigger alerts automatically on the Alertus System with Databuoy Shotpoint gunshot detection

This software integration combines Databuoy's state-of-the-art acoustic gunshot monitoring system with Alertus' powerful alerting capabilities.

The Databuoy Shotpoint Integration enables Alertus to receive real-time gunshot events from the Shotpoint system with all relevant incident information, including camera recordings, location, zone information, and the number of shots taken. Urgency, attached with all incident details, can be shared immediately with relevant security stakeholders and responders using Alertus' location and incident-aware alerts with intelligent targeting.

Seamless Integration

Databuoy Shotpoint events trigger instant, automatic alerts on the Alertus System.

Customizable & Dynamic

Alerts can include camera footage, links, and details about the gunshot event, including location, zone, the affected area, number of shots, and more.

Granular Data Exchange

All Shotpoint incident information is accessible on the Alertus Event Dashboard.

Easy Activation & Setup

The Alertus Server uses detailed location information from Shotpoint to send alerts while making decisions about who receives the alerts and when.

Flexible Targeting

Detailed event information from Shotpoint, coupled with Alertus' Custom Event Triggers, enables targeted alerts to specific recipients and locations.

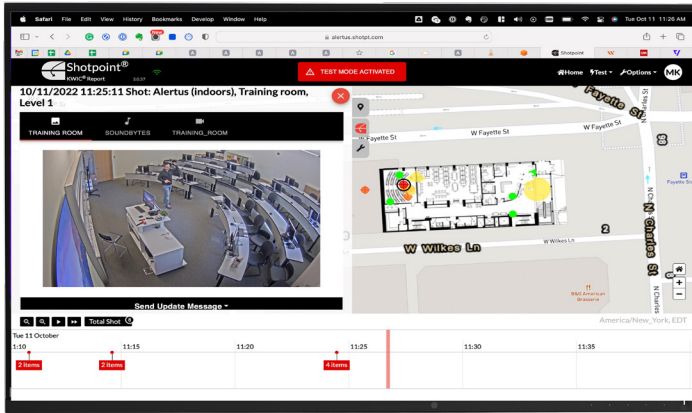

Intelligent Routing

The Alertus Server uses incident details from Shotpoint to employ intelligent decisioning and send alerts based on the data received.

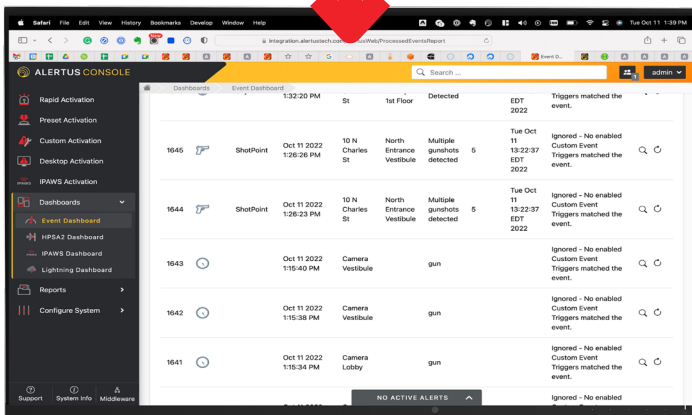

Specifications

- Requires secure HTTP connectivity between the Alertus Server and Databuoy Shotpoint Service.
- Requires activation and configuration on both the Alertus Server and Shotpoint Services for a secure connection.

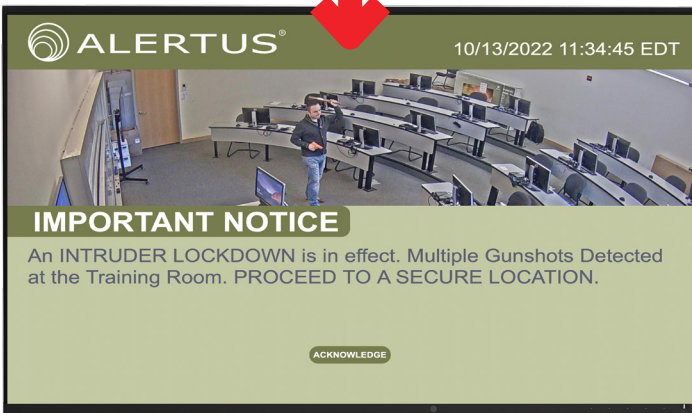

Scenario

Shotpoint system detects gunshot automatically with the audio-visual content.

Gunshot Events automatically syncs to Alertus Event Dashboard with all related data.

Alertus activates an alert to the appropriate parties with the all relevant data and media.

About Alertus

Alertus Technologies is a pioneer and market leader in emergency mass notification systems for large-area, high occupancy facilities. Since 2002, Alertus has engineered innovative solutions for unified mass notification, with solutions for facility, network, outdoor, and personal notification. Thousands of institutions and enterprise organizations worldwide trust and rely on Alertus to protect millions of people. To learn more, visit www.alertus.com.
